PREMIUMSCOLLECTION

 Belmil

BELMIL TEAM COMPANY OVERVIEW

*Thank you ♥
for supporting a
European family business*

WHO WE ARE

A third-generation family business whose mission is to create beautiful bags that bring joy into kids' kindergarten, school and everyday life. With more than 50 years' of expertise in bag production we proudly claim that we are the Leading Ergonomic School bag producer in Europe.

Our family company is located in Serbia, in Ada nearby the Hungarian border. With our own production sites and warehouses, the firm is situated on more than 10,000 m² employing over 200 people.

OUR PRINCIPLES

In the creation of Belmil bags we follow some simple principles:

Creativity and Playfulness

Following the latest trends in kids' fashion combined with various design techniques our bags are uniquely playful and creative.

Ergonomics and comfort

When developing our products, comfort and ergonomic features are priority. Our schoolbags are certified by the German AGR institute.

Uniqueness

Our collection comprises of unique designs that our designer team eagerly creates every day to fulfill our children's wishes. Thanks to our endless collection, each child can easily find a unique pack that mirrors his/her personality.

ERGONOMICS

COMFORT IN EVERYDAY WEAR

The AGR seal of approval

It is awarded only to products whose back-friendly design has been verified by an independent testing committee made up of experts from various medical disciplines. The special and at present probably unique feature of the seal is the medical, multidisciplinary approach to deciding which products receive the AGR seal of approval, without being influenced by industry which is frequently led by its own pure sales interests.

This approach also convinced the magazine ÖKO-TEST, which awarded it a “very good” rating, as well as the portal “Label-online” of the federal association “Die Verbraucherinitiative e. V.”, which rated the seal of quality as “particularly recommendable”.

The seal of approval developed by the AGR together with Germany’s two largest back school associations therefore provides valuable assistance for consumers when purchasing ergonomic everyday commodities such as office furniture, car seats, beds, bikes, upholstered furniture, shoes, satchels, furniture for children and youngsters, home workstations etc.

CHECKLIST FOR ERGONOMIC SCHOOLBAGS

- Weight & Volume (Primary school children): 1.300 g , min. 15 L
- Weight & Volume (Secondary school children): 1.500 g , min 25 L
- Comfortable handle
- Shoulder straps must be:
 - well padded with an ergonomic design: an S-shape prevents pressure sores at the neck.
 - at least 4 cm wide and made of non-slip material.
 - seamless on the shoulders with no inner seams to cause pressure or friction.
 - easily adjustable to take account of different body proportions.
- Ergonomic contours to relieve the spinous processes of the spinal column and share the main load evenly over the soft tissues along the spinal column.
- Breathable back padding for proper air circulation.
- Non-slip material with back guidance on the side, e.g. raised sides or waist flaps for the rucksack to prevent it sliding back and forth and to ensure the satchel/rucksack is positioned in the middle of the back.
- The compartments must be designed to put and carry heavier items next to the back in a specially provided inner compartment.
- A waist/hip strap with gently padded waist flaps and a chest strap that can be adjusted in length and height must fix the school rucksack securely to the body to shift the weight from the shoulders to the rear upper iliac crest. The chest strap prevents the curved padded straps from sliding off the shoulders.
- Height adjustable back panel with various size settings
